

Guide on configuring the recipient's email

1. User using the MySTARS system will have to be logged in as an administrator account.
2. To configure the student's email, the User will first have to select "Add Student" on option 2.

```
Welcome to STARS (Staff): Admin
1. Edit Student Access Period
2. Add a student
3. Add/Update a course
4. Check available slot for an index number
5. Print student list by index number
6. Print student list by course
0. Exit

Enter the number of your choice: 2
```

3. The student's email will be configured in the email entry while adding student.

```
Please enter student's name:
Mac Tan
Please enter student's matric number:
U978675R
Please enter student's email:
MacT@gmail.com|
```

4. Email entries are stored in OODP Assignment/src/Students file.

```
E;Male;Singaporean;cz2002.student@gmail.com
66E;Male;Singaporean;Johntan@gmail.com
987E;Male;Singaporean;EricT002@gmail.com
123890E;Male;Singaporean;Hteh034@gmail.com
;Male;American;Peter0349@gmail.com
```

Configuring sender's email:

To configure the sender's email, the sender's email is configured in the `sendEmail()` method of the file located in `OODP Assignment/src/helper/EmailManager.java` file.

To change the email account the program is sending from, change the email and password entries of the email account to use to the desired values in the fields *username* and *password*.

```
*/  
*/  
public String sendEmail(String email, String messageEntry){  
    final String username = "cz2002.app@gmail.com";  
    final String password = "Cz2002Application";  
}
```
